

Connecting healthtech innovation ecosystems for user-centered and business-driven entrepreneurial education propelling next-generation healthtech solutions.

HealthEConnect is a European project that unites two powerful innovation ecosystems: Copenhagen's leading ecosystem, serving as a role model, and Lisbon's moderate ecosystem, set to benefit from well-established high impact practices.

## Our mission

---

Strengthening European healthtech innovation by supporting the rise and growth of next-generation healthtech companies. We plan to achieve this through a co-designed, user-centered, and entrepreneurial-driven healthtech innovation and entrepreneurship educational offer launching in Lisbon.

## Pilot Program

---

HealthEConnect is developing a pilot in Healthcare Innovation starting in September 2023 and with a duration of 1.5 year as a specialization within the Master's in Impact Entrepreneurship & Innovation (MIEI) at Nova SBE. The pilot will combine business and medical expertise with entrepreneurship, creating a unique fusion of knowledge, hands-on experiences, and activities in collaboration with Health Innovation Ecosystem companies.

## Join the HealthEConnect Movement
